PROFESSIONAL SUMMARY

Python Developer and AI Engineer with 7+ years of experience building scalable backend systems, intelligent automation pipelines, and LLM-powered applications. Expert-level Python proficiency across Django, REST API design, PostgreSQL, Docker, Git, and CI/CD with a strong track record of delivering production-grade, well-tested code. Hands-on experience designing autonomous AI agent systems using LangGraph, LangChain, and OpenAI/GPT models, including RAG pipelines, memory management, and tool-integrated reasoning loops. Proven in remote, distributed team environments communicates proactively, contributes to architecture decisions, and writes clean, documented, reviewable code. Software Engineer with deep problem-solving instincts and a passion for applying Python expertise to real-world, high-impact challenges.

WORK EXPERIENCE

Founder & Lead Engineer

Feb 2026 - Present

RevellFlow | Lagos, Nigeria

- Designed and built a scalable Python/Django backend from the ground up REST APIs, custom authentication, vendor onboarding flows, booking engine, and payment integration.
- Integrated LangChain + OpenAI to power an intelligent vendor-matching layer using RAG and semantic search over structured event data.
- Authored comprehensive Pytest test suites covering API endpoints, business logic, and integration flows; maintained CI/CD pipeline via GitHub Actions.
- Containerised all services with Docker; owned all architecture decisions from data modelling to deployment strategy.

Lead AI Engineer

Jun 2025 - Sep 2025

Unarchived AI | Cyprus (Remote Contract)

- Led the design and development of production AI agent systems using LangGraph and LangChain including multi-step, stateful LLM workflows powered by OpenAI/GPT models.
- Implemented RAG (Retrieval-Augmented Generation) pipelines enabling agents to reason over domain-specific knowledge bases with high accuracy and reliability.
- Built scalable Python infrastructure for task orchestration, persistent memory, and tool-integrated reasoning loops; integrated external REST APIs into agent decision flows.
- Contributed to system architecture discussions for autonomous and cognitive agent frameworks; wrote robust, testable Python components with clear documentation and code reviews.

Python Programming Instructor

Apr 2024 - Feb 2025

Olutech ICT Academy | Kwara, Nigeria

- Designed and delivered a structured Python curriculum taking students from complete beginner to professional level.
- Covered core Python, OOP, data structures, web development fundamentals, and practical project work strengthening both teaching and technical communication skills.

Founder & Software Engineer

Jul 2023 - Present

Dex Facilitas | Abuja, Nigeria

- Delivered N8N automation systems for clients including an AI job-application tracker (Gmail + OpenAI + Slack), a real-time HR notification engine, and an end-to-end AI content marketing pipeline publishing to Instagram, LinkedIn, and Twitter.
- Built and shipped multiple Django + PostgreSQL backends (e-commerce, food ordering, travel booking), integrating third-party REST APIs and WhatsApp Business API for client communication.
- Set up Docker-based local and production environments and Git workflows for all client projects, reducing deployment friction and environment inconsistencies.

Technology Intern

Jun 2022 - Present

Bright Network Internship Experience UK (IEUK) | Remote

- Gained practical insight into how real-world technology businesses operate across planning, delivery, and growth functions.
- Participated in training sessions with Amazon Transport Services (ATS), covering logistics technology and operational systems at scale.

Fullstack Software Engineer

Jan 2020 - Present

Freelance

- Delivered 10+ production web applications across travel, automotive, hospitality, and e-commerce sectors each with a Python/Django backend, REST APIs, and PostgreSQL database.
- Consistently wrote Pytest unit and integration tests before deployment; reviewed code for performance, security, and scalability issues.
- Managed full deployment lifecycle: Docker containerisation, Git branching strategies, and CI/CD pipelines from staging to production.
- Collaborated directly with clients to gather requirements, iterate on features, and communicate technical decisions clearly Agile-style sprints with async written updates.

EDUCATION

B.Sc

Jun 2020 - Aug 2025

University of Ilorin | Kwara, Nigeria

- Software Engineering
- Software Development Methodology
- Software Design
- Project Management
- Database Architecture

PROJECTS

AfriTravel, a luxury travel agency website

May 2026 - May 2026

Travel Agency | Remote

github.com/Adetomiwa-Oluwatobi/adullam_travels.git

- Built AfriTravel, a luxury travel agency website with a premium, conversion-focused design for showcasing destinations, services, and travel packages.
- Developed a full-stack Django-based platform featuring service pages, destination listings, enquiry/quote system, and a custom content management dashboard.
- Implemented automated lead capture by routing client enquiries directly to Instagram DMs, with a fully responsive UI built using HTML, CSS, and JavaScript.

AI Content Marketing Automation System

Apr 2026 - Present

Tech Startup | Remote

- Built an AI-powered content marketing automation system that converts a single client form submission into a complete brand content pipeline via webhook-triggered workflows.
- Engineered an end-to-end system that generates brand strategy, 30-day content calendars, social media posts (hooks, captions, CTAs), and schedules publishing across Instagram, X (Twitter), and LinkedIn using AI (Claude/OpenAI).
- Integrated PostgreSQL/Supabase, automated validation, cron-based scheduling, and analytics feedback loops to continuously improve content performance with minimal manual intervention.

Revelflow

Feb 2026 - Present

Tech Startup | Remote

github.com/Adetomiwa-Oluwatobi/Revelflow.git

- Built RevelFlow, an event management platform connecting event planners with vendors (photographers, DJs, caterers, decorators, MCs, and more) through a centralized workflow and vendor discovery system.
 - Developed a secure Django REST Framework backend with JWT authentication, role-based access control, event management, vendor verification, contract workflows, and payment integrations.
 - Designed scalable backend architecture using PostgreSQL, Redis, Celery, and REST APIs with rate limiting, object-level permissions, and automated notifications.
-

Tech Startup | Remote

github.com/Adetomiwa-Oluwatobi/DeliveryCoo.git

- Developed Logiqo, an end-to-end logistics and delivery management platform connecting e-commerce businesses with last-mile delivery services.
- Built features for inventory management, order processing, real-time delivery tracking, role-based access control, and vendor marketplace operations.
- Integrated Paystack payments, automated email/SMS notifications, analytics dashboards, and multi-user workflows to streamline logistics operations.
- Python
- Django
- PostgreSQL
- redis
- Html
- Css
- Js

SKILLS

PYTHON

Django (Advanced) Flask (Intermediate) REST APIs (Advanced) OOP (Advanced) Design Patterns (Intermediate)

Async Python (Advanced)

DATABASE

PostgreSQL (Advanced) MySQL (Advanced) MongoDB (Advanced) Redis (Advanced) Query Optimisation (Advanced)

TESTING

Pytest (Advanced) Unit Testing (Advanced) Integration Testing (Advanced) Code Review (Advanced)

DEVOPS

Docker (Advanced) Git (Advanced) CI/CD (Advanced) GitHub Actions (Advanced) AWS (Intermediate)

LANGUAGES

English Advanced

LICENSES & CERTIFICATIONS

Python Core

Aug 2022

Sololearn

CT-HNX3BIBU | www.sololearn.com/Certificate/CT-HNX3BIBU/png

Huawei Certified ICT Associate (Datacom)

Huawei

•Huawei Certified ICT AssID: 010103901603810042412764636 |
